*Welcome to the Fourth Edition of the Form to Function Sale. It's once again been an incredible pleasure to work with these firms to assist in conducting their event. It's never easy getting ready for a sale, but when you are working with great people who truly want their event to work - breeders that design their cattle to work for their customers - things can't help but go well.*

*This year's sale is stacked with the largest offering from BSG - highlighted by some of the best heifers they've ever let go. Byland has once again brought forward a great set of females for your evaluation - the deepest cut they've made for F2F yet. And, if you want to really see how the F2F breeding program works - just look at the progress Shady Maple Farms has made in the last four years - an outstanding group of females from them as well in this year's offering.*

*It's an exciting year for the Form to Function crew and we can't wait to present these cattle to you on September 2. Please join us in Greens Fork, Ind. and as always, don't hesitate to call if you have any questions about the offering.*

See you at the sale,

What an incredible way to start the 2011 catalog. When Phil showed me this pen of fall heifers he held over - I nearly fell over. It took some convincing - especially since these two females were selected as the base for the new Bowman Blend program (see lots 35 – 41,) but he'll let one of these fabulous twins go to a new home.

Take your pick! 972 is long patterned, deep bodied and has incredible mass and her look-alike twin sister may be just a tick more moderate and powerful. You get to decide on this one. What a truly great pair of females that blend the BSG breeding program wonderfully. Practical, powerful cattle predestined for profit. This is what it's all about at BSG!

# BYLAND'S FIRST DAUGHTERS OF CF BIG BROWN X LOTS 2-4

## LOT 2 BYLAND AUGUSTA BRAE OBB28

BYLAND AUGUSTA BRAE 4GS2 – x4080414

*A.I. 5/9/11 to JSF Gauge 137W – Safe in calf – Due 2/16/12*

The Byland herd is known for producing foundation females and these next three heifers by CF Big Brown are going to be just that. Lot 2 is as perfect a combination of pattern and ruggedness as you can make in a Shorthorn female – don't trust the photo – she's even better in person!

It's not every day Byland would let one go that's out of a female like her mother – Dr. Byers refers to the Mission sired dam of this heifer as "our most ideal looking cow." Not to mention Lot 2 has a 79 lb BW and ranks among the top 15% of the breed for both WW and YW predictors. Incredible look, incredible pedigree and outstanding performance blended into one package. Form to Function? Here it is! Pay close attention to these heifers bred to JSF Gauge 137W. He's the Byland and Select Sires purchase from Jungels' 2011 NWSS sale. Massive, deep and correct, the Byers think he's the one - Gauge was AI'ed to nearly 70 females at Byland this spring!

BYLAND VELVET 4V118 - \*4102396

*A.I. 5/28/11 to JSF Gauge 137W – Safe in calf – Due 3/6/12*

It really doesn't matter what kind of cattle you like – you'll love Lot 3. This heifer possesses a radical combination of style, muscle, bone and body all wrapped together and placed on a moderate frame. The front ends on the Big Brown's are remarkable and this one is simply incredible. It's hard to find females in any breed of any specie that are this stout that remain this feminine. Oh, and performance? Lot 3 ratioed 113 for BW, 107 for WW and ranks in the top 15% of the breed for YW EPD. Pretty? Powerful? Productive? Again, it really doesn't matter what kind of cattle you like – own this one.

BYLAND VELVET OFB33 - \*4020226

*A.I. 7/27/11 to FSF Proud Jazz X*

Beautifully patterned and fancy, Lot 4 is the youngest heifer in the offering, so don't discount her performance – she ranks in the top 10% of the Shorthorn breed for WW and YW EPD's. She's got the Big Brown neck and the pattern of her deep bodied, massively designed Victory dam that we love, plus she's bred to our full brother to Jake's Proud Jazz.

We're only five deep and I already found another heifer you'll like a whole lot more in person. 16X has made the list of everyone who visited SMF this summer. The Wilson family from Jamestown, Ind. purchased her popular full sister in the 2009 sale as the foundation piece for their daughters' cowherd.

We love the Pansy's. Nothing else on the farm consistently throws as much power, bone and look as they do. Check the BW predictor here and know that with 345 and the Pansy family you're going to have a female that stamps her progeny with an unprecedented combination of design, stoutness, calving ease AND an outcross pedigree. The whole package – shipped priority from Shady Maple.

A picture perfect painting of her picture perfect dam, Lot 6 is as correct, feminine and attractive as any Navigator we've had. This powerful future donor has been a stand out since the day she hit the ground and her versatile pedigree makes her an outstanding selection in the offering. Her JSF Capiche calf should be a great starting point – then just mate her to match your program. Look for her maternal sister by Dover on display sale day. Lot A is a full sister to all of the Queen greats - 4 Queens, 5 Queens, Ellie Mae at Cates Farms, 7 Queens at WHR, 10 Queens and 15 Queens at Sullivan Farms, and others. Her sisters have had a tremendous influence on the breed and no doubt 16 Queens can do the same. 16 Queens may be the most moderate of all the siblings. Admittedly, we haven't mated this former show champion the way you might, but she has done a great job for us and we'll be retaining her Sherman daughter from this spring. We imagine this will be that last opportunity to ever purchase a Trump x Casino 100 female. You + 16 Queens. Get ready for the royal wedding!

A true BEEF female. Deep and flexible with great balance, adequate muscle and moderation of frame, Lot 9 is our favorite from the first crop of 12M calves. Her maternal great grand dam was one of our original three cows. This spring, at 20 years of age she still had an outstanding good-working udder and perfect feet. Every female in 048's pedigree is easy fleshing, moderate framed, and has huge amounts of volume. We would love to use a bull out of this bred heifer.

Of all we've tried at BSG - the Alicia's remain our favorite cows. With a combination of look, performance and calving ease like this - it's easy to understand why. Lot 12 has style to burn and on the performance side, she posts a negative BW predictor ranking among the top 5% of all non-parent shorthorns and she ratioed on the plus side for weaning and yearling weight. Her pedigree is stacked with maternal excellence - Rider 12M is the top son of our former herdsire DFS Red Rider 844 and the dam here is a direct daughter of the original Alicia cow. Invest in one our best.

We like 'em practical and productive first and foremost – but there's nothing wrong with having one as good looking as Lot 13. Sharp fronted and dead level in her design, 063 packs plenty of power behind. Want to raise some cool looking, heavy muscled show calves? This heifer might be your favorite. Her calf by Tabasco should have you off and running in the phenotype business – and her bull progeny could be incredibly powerful too. Keep us posted on what this one does – she'll be a fun one to own!

Another 12M daughter by a female that we selected with Lloyd Arthur as our pick of the Sullivan Farms bred heifers a couple years ago. To us her mother was an outlier for offering dependable calving ease genetics coupled with real world fleshing ability. We like our cows moderate, phenotypically solid and easy fleshing. This heifer has it plus she possesses an incredibly versatile pedigree. See her in person Labor Day weekend – she'll make your short list for certain.

One of Phil's favorites from the 2010 crop, Robin 031 is as big-volumed and easy keeping as we can put one together. Her shear power of rib and muscle bring her to the surface in the pasture and solid weaning and yearling performance coupled with a birth number well below breed average make this female a standout on paper as well. The Robin cattle are a Form to Function favorite - you'll be hearing a lot more out of them from BSG in the years to come as well. Practical, productive, Shorthorn beef cattle – we're IN!

Here's one from the original Rider at Bowman Superior Genetics – DFS Red Rider 844. If you were at the second Form to Function sale, you'll surely remember the solid red donor on display with her 844-sired calf at side. That was BSG Robin 429 - the donor mother of Lot 17. You couldn't take your eyes off of 429 and her calf on sale day – and you won't be able to take your eyes off this solid red beauty either.

Maternal excellence comes to mind anytime you talk about 844 – and Robin 429 is quite possibly both the highlight of the BSG herd and the future cornerstone of the program. Dig deep and take this one home – she'll pay you back time and time again.

Her pedigree is a literal who's who of the Byland program - RB Eagle, Cindy Beauty, Velvet, Mel-Bar Rodeo Drive 347 and more breed greats mortarboard the paperwork of this fabulous heifer. OE20 is built right in every angle and packs the power you expect from RB Eagle 226th. Take home all this quality with Byland performance to back it up. Lot 18 put up solid growth numbers while ratioing 108 for BW at 73 lbs. and marking a BW EPD that ranks in the top 20% of the breed.

This is the first HC Leader's Legacy female to be offered in the Form to Function. A number of breeders are turning to older shorthorn genetics to bring back the famous maternal ability of the breed.

Dennis Hoffrogge from Minnesota has had tremendous success with the old Leader 21st bull in his herd. The Lot 22 female represents this same rare opportunity.

It has been fun to watch the Legacy cattle develop. Moderation of frame, depth of body and an easy doing kind describes the group. This heifer in particular is very deep and moderate with solid structure.

If you want a super productive cow that will raise your heaviest calves at weaning and yearling, don't miss Lot 33. A real performance machine, this heifer shoved down the scales to ratio 111 at weaning and 122 at yearling - making her the fastest growing female in the Bowman group by quite a margin. Her pedigree backs up her predictability with EPD rankings for WW in the top 10% of the breed and YW in the top 3%.

# The Bowman Blend

Dear Commercial & Seedstock Producers,

At BSG, we are serious about proving that Shorthorn cattle are commercially applicable. That's why we've created a new program, The Bowman Blend. We believe that the British-based F1 animal is a superior beast. While we are constantly encouraging commercial cattlemen to use Shorthorn genetics, we struggle at times to meet their acceptance. In order to prove how much faith we have in the advantage of maternal heterosis, we've selected several females in our purebred herd to produce Angus-sired Shorthorn Plus genetics.

In addition to the ShorthornPlus cattle that have been so successful for Shady Maple & Galbreath customers in previous editions of F2F, we're offering several purebred females with the F1 mating in-utero. We believe when you get these cattle on the ground (with no assistance) and start to realize how much nicer it is when the CATTLE work for YOU, you'll begin to trust in the value Shorthorn cattle provide to commercial beef production as much as we do.

Study the heifers BSG is offering here mated to Regis as well as the ShorthornPlus heifers that follow in the catalog. Try one on for size and be prepared to be excited about the value Shorthorn Plus genetics can provide to your mating scheme.

Sincerely,  
*Phil Bowman & Family*

### Selling 50 units of semen

From the Dover Ranch Corporation, Billings, Mont., we latched on to "Dover" the moment heard he was for sale. His incredible body mass and depth, impeccable structure and perfect balance define his phenotype. His pedigree is linebred - and completely outcross. SMF is retaining EVERY daughter produced by Dover so far. They are absolutely STAMPED with his massive rib and balance. The top of his 2011 crop from SMF will be on display sale day.

Top 20% rank for BW, top 2% for WW and top 3% for YW. Inject massive amounts of real body, growth and fleshing ability. Clean up joints and udders. Keep all the pattern and style you've worked so hard to attain. Dover is the answer.

This is the only Dover semen that will be offered in 2011. Lock in - or wish you had. Semen will be available for pickup sale day or can be shipped at the buyer's expense.

## The Bowman Blend

### REFERENCE SIRE

## BSG BURRIS 051

### SERVICE SIRE TO LOTS 35 - 41

OCC Prototype x N Bar Emulation EXT

One of the heaviest muscled Angus bulls you'll see!

He is incredible. Moderate framed, wide based, docile.

Ask to see him before the sale. Impressive young Angus sire.

Coleman Regis: S A V Final Answer x Coleman Donna 714 (by Connealy Onward)

## COLEMAN REGIS
